To Whom It May Concern:

Re: Proceeding Number 10-238

This is to comment on the proceedings for getting local TV in our area. Ever since I've moved into this area of Colorado, in 1974, I have been subjected to New Mexico TV as my option for "local" TV viewing. New Mexico is not "local" to me. For most of these years, I was a Colorado State employee and therefore that much more interested and of need to view local political and state happenings. In order to see anything local to Colorado I've had to surf the internet for news, and of course, this isn't always possible.

As for the Nelson ratings, and therefore you using their data to project what households in this area watch the most, how is that even fair when we don't get anything but NM shows?? Obviously those results will be skewed to NM. If there was another option and we could choose between the two for you to look at, then you would find overwhelmingly that we would choose Colorado and not New Mexico.

I reside in Colorado, I vote in Colorado, I pay taxes in Colorado, my vehicles are registered in Colorado, I am insured with a Colorado rate, I travel to Denver as the city to go to and conduct business, I shop in Colorado, and the list goes on and on and on. I do not want to watch New Mexico news, nor be subjected to months of political ads and information on candidates who do not even represent me. I do not shop in the areas that they advertise for. I do not travel to Albuquerque to do my business. I am a COLORADO resident!

It is many years past time for you to provide the entire state of Colorado with local TV. It is not right for this supposed market to control such important things in our life. It is said that the Albuquerque, NM stations provide "local" information, and would help us with weather and emergency info in our area, but they do a very poor job at that. Most of the time, the focus is on New Mexico only.

Thank you for your serious consideration,

Sue Jackson
